- › Efficient - All day protection
- › Cost effective

Virostop Applications

It is a known fact that the highest risk of contamination is via the toilet door handle and surrounds. By placing the Virostop automatic dispenser at the toilet entrance / exit users are able to fully protect themselves and others from the spread of germs with just one pass of the hand. Place a Virostop automatic dispenser at the top and bottom of the escalator and give shoppers piece of mind that they are protected against germs living on the hand rails at all times.

AREAS OF USE

- › Schools & childcare – child friendly
- › Baby change rooms
- › Public venues, pubs, restaurants, hotels
- › Airports, travel, aircraft
- › Supermarkets & shopping centres
- › Workplace, office, gymnasium
- › Public toilets
- › Hospitals & healthcare facilities
- › Transport industry
- › Trains, trams & ferries
- › Sporting venues
- › Shipping and cruise lines

Virostop Key Point of Difference

Virostop has lasting Antimicrobial qualities that continue to kill germs 24 hours after being applied whereas the effectiveness of alcohol based sanitisers may reduce once alcohol evaporates. Virostop will continue to perform up to 10 hand washes. The long lasting Aloe Vera aroma is an indicator that the product is still doing its job.

Virostop Packaging

Available in: Mini key ring, 50ml, 250ml, 500ml, 5 litre, 20 litre, 1000 litre
